- Impact Cities and People
- Diversify your career opportunities

Master the skills of time management

Elevate your levels of articulation

Academic trips to world class cities

City-CAD Workshop: A 1st time in Bahrain

The BSc in Architecture is a five-year programme that takes you through an exciting academic journey full of practical skills, theoretical knowledge, and critical thinking abilities related to the built environment. Students will learn how to create a responsive and inclusive built environment through mastering the design thinking process, the scientific underpinning, the various design representations, and the technologic solutions for buildings.

At the end of the educational process, students will be able to design architectural projects that respect people's values, culture, and wellbeing and provide environmentally friendly and sustainable buildings. The career opportunities are diverse and cover public and private sectors, ministries, and banks, such as designer and project manager, landscape architect, interior architect, urban planner, restoration architect, and many more.

- ✓ The only all-women architecture program in Bahrain.
- ✓ Instructors with diversified background and international experience.
- ✓ Well established links with industry.
- ✓ Experience a high quality of education.
- ✓ A well equipped and state-of-the-art campus.
